

What is the Virtual Model-Netics Instructor Training Program (ITP)?

The Virtual ITP is a program to train Model-Netics instructors utilizing a combination of live interactive online sessions and on-demand sessions. A hallmark of the Model-Netics ITP also continues to be our practice teaching sessions. These sessions are a crucial component in the core development of the Model-Netics instructor.

What is the Program Schedule?

Live Interactive Sessions (2 sessions per week / 3.0 hours each):

Week 1 – Aug. 2, Aug. 4

Week 2 – Aug. 9, Aug. 11

Week 3 – Aug. 16, Aug. 18

Week 4 – Aug. 23, Aug. 25

Practice Teaching Sessions coordinated with instructor candidates based on availability

On Demand Sessions/assignments completed outside of interactive sessions

Requirements for Model-Netics Instructor Associate Designation

Attendance of all sessions during the 4-week program is required for certification. Instructor candidates must successfully complete all on-demand course work and practice sessions by 9/15/22.

Course Materials

Model-Netics® Instructor Workbook containing a detailed note page for each of the 151 models

Access to the Online Model-Netics Instructor Resource Library featuring an administrative guide for conducting Model-Netics classes together with detailed course content including materials

Tuition Fee

Tuition fee per instructor candidate:
\$4,750
